Author's Note.

This little book is the outcome of numberless inquiries from students in my classes for an authentic and comprehensive text-book on the Theory and Technique of Dancing. Each step has been considered from four important aspects: definition, time, execution and purpose. These have been arranged in a particularly usable and attractive form, that should recommend this volume to teachers as a practical reference book.

DANCING STEPS

ATTITUDES ("5 POSITIONS")

Definition.

An *attitude* is a posture executed with both feet on the floor.

There are 5 standard attitudes, commonly called, "the 5 positions". The 1st, 3rd and 5th are known as "closed positions", because the feet are together; the 2nd and 4th "open positions", because the feet are apart.

All positions are named from the front, and when the foot is placed in a corresponding position in rear, the word "behind" is added, thus: left foot in 3rd position as opposed to: left foot in 3rd position behind.

The 3rd and 4th positions follow the *law of opposition*, which means that the hand opposite to the foot in front is high. (See drawings of above positions.)

The so-called "stationary position", or lower 1st position, is used as a starting position for the 5 attitudes.

Music: $2/4$ time.

STATIONARY POS.

Stand with feet together; arms down in front, palms facing body.

1st Position

1st Pos.

Stand with feet together; arms move slowly upward till they are in-line with the waist line, palms down till the movement is almost completed, when hands are turned, so that palms face each other. Arms are kept well away from the body and a perfectly natural position of the hands is maintained thruout this and all other attitudes.

1st position denotes attention.

2nd Position

2nd Pos.

Right (left) foot slides to the side, toe well pointed; arms move slowly to side, palms up. When finished, palms may remain up or be turned down.

2nd position denotes strength.

3rd Position

3rd Pos.

(Opposition of Arm and Foot)

Right (left) foot draws in till the heel touches the instep of stationary foot; left (right) arm moves slowly upward and in front of head, so that palm can be looked into easily; body bends to right (left).

3rd position denotes dignity.

4th Position

Right (left) foot slides forward, foot resting

4TH POS.
(Opposition of Arm and Foot)

on the four little toes; right (left) arm moves slowly down to 1st position; body bends to right (left.)

4th position denotes haughtiness.

5th Position

5TH POS.

Right (left) foot draws back till the heel touches the toe of the stationary foot; right (left) arm moves slowly upward thru 1st position to position above and in front of the head; body straightens.

5th position denotes beauty.

ARABESQUE

Definition.

An *arabesque* is a posture executed with one foot on the floor.

MOVEMENTS

Definition.

A *movement* may mean first, an activity of the body from a resting position, or second, a change from one activity to another.

There are 9 standard movements in dancing:

- 1—droit—to swing the foot forward and backward.
- 2—overt—to swing the foot from right to left.
- 3—glissé—to slide.
- 4—tourné—to turn.
- 5—tortiller—to twist.
- 6—battu—to beat.
- 7—sauté—to hop.
- 8—jeté—to leap.
- 9—coupé—to cut.

A STEP

Definition.

A *step* means a placing of the foot in any direction and transferring the weight onto it. Thus:

Step right foot	{	forward (a)
		sideward right (b)
		backward (c)
		diagonally forward right (d)
		diagonally backward right (e)
		across in front (f)
		across behind (g)

The left foot follows a corresponding series.

FRAPPE

Definition.

Frappé to stamp. May be executed with one or both feet, beginning from toes.

Note. In practise, when in ballet slippers, care must be taken to only feign the stamping, so as not to jar the nerves of the spinal column.

ELEVER

Definition.

Elever—to rise on the toes.

May be executed in each of the 5 positions, but in the 2nd position and 4th position both heels are flat on the floor at the start. The arm movement follows the "law of opposition." Music: $\frac{3}{4}$ time.

Execution.

Elever in 1st position

Prep.

{	Stand with feet in 1st position.
	Arms in 2nd position.
	Rise on toes,
	Arms move thru 1st to 5th position.
	Lower heels,
{	Arms move to 2nd position.

Elever in 2nd position.

Prep.

{	Stand with feet in 2nd position (both heels on floor).
	Arms in 2nd position.

- { Rise on toes,
 Arms move to 1st position.
 { Lower heels,
 Arms move to 2nd position.
- Elever in 3rd position.
 Prep. { Stand with right (left) foot in 3rd position,
 Arms in 2nd position.
- { Rise on toes,
 Arms move thru 1st to 3rd left (right).
 { Lower heels,
 Arms move to 2nd position.
- Elever in 4th position
 Prep. { Stand with right (left) foot in 4th position, (both heels flat on floor.)
 Arms in 2nd position.
- { Rise on toes,
 Arms move thru 1st to 4th left (right).
 { Lower heels,
 Arms move to 2nd position.
- Elever in 5th position.
 Prep. { Stand with right (left) foot in 5th position.
 Arms in 2nd position.
- { Rise on toes,
 Arms move thru 1st to 5th position.
 { Lower heels,
 Arms move to 2nd position.

Purpose. Elever develops balance.

PLIER

Definition. *Plier*—to bend the knees.
 May be executed in each of the 5 positions,
 also on one or both feet.

Music: 2/4 or 4/4 time.

{ Rise on toes	count 1
{ Bend knees sideward	count 2
{ Straighten knees	count 3
{ Lower heels	count 4

Purpose. Pliers develop suppleness and balance and are valuable for toe dancing

GLISSE

Definition. *Glissé*—to slide.
May be executed in all directions.

PETIT BATTEMENT

Definition. *Petit Battement*—low beating.
May be executed from any closed position, but 3rd and 5th positions are preferable.
Music: 2/4 time.

Execution. Petit Battement in 2nd position.

Prep. { Stand with left foot in 3rd position.
{ Arms in 2nd thruout exercise.

{ Slide right foot to 2nd position.
{ Draw right foot in to 3rd position.
{ Slide left foot to 2nd position.
{ Draw left foot in to 3rd position.

Continue for 16 measures, moving forward; this leaves the left foot in 3rd position. Commence moving backward by sliding left foot to 2nd position and drawing in to 3rd position behind; repeat with right foot and continue 16 measures in all.

Petit Battement in 2nd and 4th positions.

Prep. {Stand with left foot in 3rd position,
Arms in 2nd position thruout exercise.

{Slide right foot to 2nd position.
Draw right foot in to 3rd position.
Slide right foot to 4th position.
Draw right foot in to 3rd position.

{Slide left foot to 2nd position,
Draw left foot in to 3rd position,
Slide left foot to 4th position,
Draw left foot in to 3rd position.

Continue for 16 measures, moving forward;
this leaves the left foot in 3rd position.
Commence moving backward, thus:

{Slide left foot to 2nd position,
Draw left foot in to 3rd position behind.
Slide left foot to 4th position behind,
Draw left foot in to 3rd position behind.

Repeat with right foot and continue 16
measures in all.

Petit Battement in 2nd and 4th positions,
avec Port de Bras.

Execution.

Same exercise as above with the following
arm movements inserted between the change
from foot to foot:

When the right foot has completed the
series, it is held in 3rd position, while arms
move thru 1st to 4th position opposition
(left arm high) and again to 2nd position;
the body bends naturally away from the
high arm and straightens again as arms move
to 2nd position.

The left foot then executes the beatings, is held in 3rd position at finish, while arms are moved, this time right arm is high.

Purpose.

Petit battement develops leg and foot extension and promotes good bodily carriage.

GRAND BATTEMENT

Definition.

Grand Battement—high beating.

Executed from 1st position when on place, from 3rd (or 5th) position when moving forward or backward. The knee is kept straight in all beatings except backward, when it is slightly bent and the direction of the entire leg is inward. The toes must be well stretched, they are the last to leave the floor and the first to regain it. The body is held upright and still during entire exercise.

Music: 2/4 time.

Execution.

Grand Battement (on place).

Prep. {Stand with feet in 1st position,
{Arms in 2nd position thruout exercise.
{Raise right leg sideward,
{Close right leg in 1st position.
{Repeat.

Same with left leg.

{Raise right leg forward,
{Close right leg in 1st position.
{Repeat.

Same with left leg.

{Raise right leg backward.
{Close right leg in 1st position.
{Repeat.

Same with left leg.

Repeat the sideward exercises with right and left legs to finish strain of music.

Grand Battement (moving forward).

Prep. { Stand with left foot in 3rd position.
Arms in 2nd position thruout exercise.
Raise right leg backward and close in 3rd position behind.
Raise right leg sideward and close in 3rd position.
Raise right leg forward and close in 3rd position.
Repeat forward raising once.

Same with left leg.

Continue alternately right and left any number of times.

Grand Battement (moving backward).

Prep. { Stand with left foot in 3rd position.
Arms in 2nd position thruout exercise.
Raise left leg forward and close in 3rd position.
Raise left leg sideward and close in 3rd position behind.
Raise left leg backward and close in 3rd position behind.
Repeat backward raising once.

Same with right leg.

Continue alternately left and right any number of times.

Purpose.

Grand Battement gives strength and vigor and develops high extensions, large steps and leaps.

DÉGAGER

Definition.

Dégager—to transfer, to sway.
May be executed in 2nd position; 2nd and 4th position; 2nd and 4th position behind.
Music: $\frac{3}{4}$ time.

Note—Each change is made by rising on the toes of *both* feet.

Execution.

Dégager in 2nd position.

Prep.

(1)

(2)

(3)

- Prep. { Stand with right foot in 2nd position.
 { Arms in 2nd position.
 { Rise on toes (of both feet) and transfer weight to right foot.
 { Arms lateral to left; head turned to right.
 { Rise on toes again.
 { Extend right arm forward and to 2nd position.
 { Transfer weight to left foot.
 { Arms lateral to right; head turned to left.

Dégager in 2nd and 4th positions.

- Prep. { Stand with right foot in 2nd position.
 { Arms in 2nd position.

"A"

- { Rise on toes (of both feet) and transfer weight to right foot.
 { Arms lateral to left; head turned to right.
 { Rise on toes and sway back onto left foot, draw right foot to 1st position.
 { Arms move to 2nd position.

"B"

- { Slide right foot forward and transfer weight to it.
 { Arms move to 5th position, body bends to left.
 { Rise on toes and sway back onto left foot; draw right foot to 1st position.
 { Arms move to 2nd position; body straightens.

Repeat, commencing to left side.

Dégager in 2nd and 4th positions behind.

Prep. { Stand with right foot in 2nd position.
Arms in 2nd position.

Repeat "A" of above exercise.

{ Rise on toes and slide right foot to 4th
behind and transfer weight to it;
Arms lateral to right; body bends to right.
Rise on toes and draw right foot to 1st
position,
Arms move to 2nd position and body
straightens.

Purpose.

Dégager develops poise, balance, grace,
co-ordination.

ASSEMBLE

Definition.

Assemblé—to bring the feet together.
Executed from an open to a closed position
(1st, 3rd, 5th).
Music: 6/8 time.

Execution.

Assemblé (moving forward).

Prep. { Stand with right foot in 3rd position.
Arms in 2nd position.
{ Slide right foot to 2nd position,
Arms move to 1st position.
{ Close right foot in 3rd position.
Arms move to 3rd position left;
body bends to right.
{ Slide left foot to 2nd position,
Arms move thru 2nd to 1st position.
{ Close left foot in 3rd position,
Arms move to 3rd position right;
body bends to left.

Continue as often as desired.

Assemblé (moving backward).

- Prep. { Stand with right foot in 3rd position.
Arms in 2nd position.
Slide right foot to 2nd position.
Arms move to 1st position.
Close right foot in 3rd position behind.
Arms move to 3rd position right;
body bends to left.
Slide left foot to 2nd position.
Arms move thru 2nd to 1st position.
Close left foot in 3rd position behind.
Arms move to 3rd position left;
body bends to right.

Continue as often as desired.

Purpose. *Assemblé* develops decision and finish.

BALANCE

Definition. *Balance*—a combination of a slide (*glissé*), a closing of feet and rising on the toes (*assemblé et élever*) and a lowering of heels (*retomber*).

May be executed sideward, forward and backward.

Music: $\frac{3}{4}$ time.

Execution. Balance (sideward).

- Prep. { Stand with feet in 1st position.
Left arm at waist, right arm hanging at side.
Slide right foot to side,
Close left foot in 1st position and rise on
toes (of both feet).
Lower heels.

Return to starting position by repeating balance-step commencing with left foot.

Right arm swings easily to 1st position and down, swinging higher with each repetition until 5th position is reached.

Repeat all commencing with left foot to left side;
Arms reversed.

Balance (forward and back).

Prep. { Stand with feet in 1st position,
Arms in 2nd position.

{ Slide right foot to 4th position,
Close left foot in 3rd behind and rise on toes
(of both feet),
Lower heels,
Arms move thru 1st to 5th position,
Body bends to left.

{ Slide left foot to 4th position behind,
Close right foot in 1st position and rise on
toes (of both feet),
Lower heels.
Arms move to 2nd position.

Repeat whole, commencing forward with right foot.

Purpose. Balance-step develops poise, control, co-ordination, grace.

THREE-STEP TURN

Definition. *Three-Step Turn*—a complete turn, either right or left, executed by taking three steps.
Music: 4/4 time.

Three-step Turn.

Execution.

- Prep.** { Stand with feet in 1st position,
Arms in 2nd position.
- { Step sideward with right foot
Arms in 2nd position count 1
- { Turn one-half way round to right and
Step sideward on left foot,
Arms thru 1st to 5th position count 2
- { Complete turn right and
Step sideward on right foot,
Arms move to 2nd position count 3
- { Hold left foot in 2nd position count 4

Repeat to left side commencing with left foot.

Purpose.

The three-step turn is a preparatory exercise for a tour de basque.

SAUTÉ

Definition.

Sauté—to hop.

May be executed on one or both feet, in any direction or with a turn (the latter called "tour sauté.")

Sauté is a jumping exercise and must be begun with a tiny bend, then hop, then land with a tiny bend. The raised leg is slightly bent and the direction of entire leg is backward and inward. Bend trunk backward toward raised leg; keep head in line with forward foot.

Music: 6/8 time preferable in technique; 2/4, 3/4 4/4 may be used in dances.

Execution.

Sauté (on place).

Prep. {Stand with left foot in 3rd position.
{Arms in 3rd position open (left arm high).

{Raise right leg backward and
{Hop on left foot.

Continue hopping on same foot any desired number of times.

Bring arms thru 1st position to 3rd position right open and hop on right foot any desired number of times.

Note—Arms do *not* follow "law of opposition."

Tour Sauté.

One step preparation and one hop, turning completely around in same direction of step. Arms in 3rd or 5th position.

Purpose.

Sauté is an aerial exercise and develops lightness.

JETÉ

Definition.

Jeté—to leap or throw the weight from one foot to the other.

May be executed in all directions or with a turn (the latter called "tour jeté").

In moving forward the raised foot comes behind; in moving backward, it comes in front.

Arms are lateral in opposition; trunk bends to side of weight.

Music: 6/8 time.

Jeté simple—a tiny little leap without leg extension sideward (1 count)

Jeté à la second—a leap with leg extension sideward. (2 counts)

Jeté grand—a leap with high leg extension sideward. (2 counts)

Execution.

Jeté (moving forward).

Prep. { Stand with right foot in 3rd position.
Arms in 2nd position.

ft. raised behind.

{ Leap sideward onto right foot,
Left foot in 5th position raised behind,
Arms lateral to the right,
Body bent to right and
Head thrown back.

{ Left arm leads to 2nd position,
Leap sideward onto left foot,
Right foot in 5th position raised behind,
Arms lateral to the left,
Body bent to left and
Head thrown back.

Note—The space covered is not so much sideward as forward.

Jeté (moving backward).

Prep. { Stand with right foot in 3rd position.
Arms in 2nd position.

ft. raised in front.

{ Leap sideward onto right foot,
Left foot in 5th position raised,
Arms lateral to the right,
Body bent to right and
Head thrown back.

Same with left foot.

Note—The space covered is not so much sideward as backward. In both exercises it is possible to move forward or backward on a straight line, which would be the most dignified execution.

Execution.

Tour Jeté.

Prep. { Stand with right foot in 3rd position.
Arms in 2nd position.

{ Step sideward with right foot,
Leap onto left foot making a complete turn,
Arms move thru 1st to 5th position,
Step sideward onto right foot,
Arms move to 2nd position.

Note—Above exercises may be taken in any direction. A tour jeté consists of one step and one leap, the second step being added as a finish.

Execution.

Grand Tour Jeté (moving backward).

Prep. { Stand with left foot in 3rd position.
Arms in 2nd position; body turned to right.

{ Hop on left foot,
 Slide right foot backward,
 Arms in 2nd position,
 Draw left foot to 3rd position,
 Left arm to 1st position.
 { Step backward on right foot } making a com-
 Leap onto left foot, } plete turn right.
 Arms move thru 1st to 5th to 2nd position.

Purpose. Jeté is an aerial exercise and develops lightness.

Walking is a series of tiny jetés, which become very pronounced in *running*.

TORTILLER

Definition. *Tortiller*—to twist or turn the leg.
 May be executed with one or both feet.
 Music: 4/4 time.

Execution. Tortiller.

Prep. { Stand with feet in 1st position.
 Arms hang loosely at sides thruout exercise.

{ Turn right heel out,
 Turn right toes out,
 Turn right toes in,
 Turn right heel in (feet in 1st position).

Repeat with left foot.

Repeat with both feet.

Purpose.

Tortiller strengthens the arch of the foot and is an excellent orthopedic exercise.

COUPÉ

Definition. *Coupé*—to cut.
Executed from a raised to a raised position.
(2nd position raised or 4th position raised).
Music: 6/8 time.

Execution. Coupé in 2nd position.

Prep. { Stand with right foot in 2nd position raised,
Arms in 2nd position thruout exercise.

{ Bring right foot to left and
Cut left foot to 2nd position raised.

Continue left and right alternately.

Prep. { Coupé to 4th position raised.
Stand with right foot in 4th position raised,
Arms in 2nd position, palms up,
Body turned toward left corner,
Head turned forward.

{ Bring right foot to left and
Cut left foot to 4th position raised behind.

{ Bring left foot to right and
Cut right foot to 4th position raised.

Continue any number of times.

Change position and face right corner,
left leg in 4th position raised.

Purpose. Coupé develops precision.

PETITE ROND de JAMBE

Definition. *Petite Rond de Jambe*—small foot circles
(described on the floor).

May be executed:

From 1st position to 1st position;

From 2nd position to 2nd position;

From 4th position to 4th position.

Each petite rond de jambe occupies one-fourth of a large circle and the direction may be (1) forward and outward or (2) backward and inward.

Music: $\frac{2}{4}$ time with accent on second beat
(after Chant) to give decision.

Execution.

Petite Rond de Jambe outward (from 1st to 1st position).

Prep.

{ Stand with feet in 1st position,
Arms in 2nd position thruout exercise.

{ Slide right foot to 4th position,
Slide right foot to 2nd position,
Draw right foot to 1st position.

Note—Execute with straight legs; when 4th position is reached the leg and ankle are stretched as far as possible; same is true in 2nd position.

Purpose.

Petite Rond de Jambe develops the muscles of the hip, ankle and toes.

ROND de JAMBE

Definition.

Rond de Jambe—circles described in the air by the leg.

Direction and execution as above exercise, except that the foot leaves the floor, which changes the positions to raised.

Music: $\frac{2}{4}$ time.

Grand Rond de Jambe—same as preceding exercise with high leg extension added.

Demi Rond de Jambe—one-half of a "rond de jambe," used as a preparation for certain steps.

CHANGEMENT (de Pied)

Definition.

Changement de Pied—changing the position of the feet.

Music: 2/4 or 4/4 time.

Execution.

Changement de Pied.

Prep.

{ Stand with right foot in 3rd (or 5th) position.
Arms hang loosely at sides.

{ Begin with a tiny bend of the knees.

{ Jump upward.

{ Change position of feet in the air.

{ Land with left foot in front and knees bent.

{ Straighten knees.

Repeat any number of times, always changing position of feet.

Purpose.

Changement develops lightness and quickness.

ENTRECHAT

Definition.

Entrechat—to spring into the air and change the position of the feet as often as possible before landing.

May be executed from 3rd position or 5th position.

Music: 2/4 or 4/4 time.

Purpose.

Entrechat is an aerial exercise and develops lightness, agility, skill.

PAS BALLONNÉ

Definition.

Pas Ballonné—is a combination of 3 movements; hop, step, step. Name derived from balloon and implies stepping over a balloon.

May be executed in all directions; in moving forward or backward the arms are in 2nd or 5th position; in moving sideward arms are in 3rd position. The knee of the raised leg is slightly bent.

Music: 2 4. 3, 4. 6, 8 time.

Pas Ballonné to right.

Execution.

Prep. { Stand with right foot in 3rd position.
 { Arms in 3rd position right thruout exercise.

{ Hop on left foot and raise right leg diagonally forward (knee slightly bent).
 { Step onto right foot.
 { Step onto left foot in 3rd position behind.

Note—The arms do *not* follow law of opposition.

Purpose. Pas Ballonné is an aerial exercise and develops lightness and grace.

ÉCARTE 

Definition. *Ecarté*—to jump from a closed position, open the feet in the air, and land in a closed position.

May be executed in 1st, 3rd or 5th position.
Music: $2/4$ time.

 Ecarté in 3rd position.
Prep. { Stand with right foot in 3rd position,
 { Arms hang loosely at sides.

 { Begin with a tiny bend and
 { Jump upward,
Count 1 { Separate feet sideward (or forward and
 { back) in the air.

 { Land with right foot in 3rd position and
 { knees slightly bent,
Count 2 { Straighten immediately.

Purpose. Ecarté is an aerial exercise and develops
lightness and precision.

GLISSADE

Definition. *Glissade*—is a combination of 3 movements:
1. Elever (to rise on the toes),
2. Glissé (to slide),
3. Assemblé (to close the feet).

May be executed in all directions, in moving forward or backward the arms are in 2nd or 5th position; in moving sideward arms are in 3rd position. Feet may be in 5th or 3rd position, the former is preferable for stage work.

Music: $2/4$ or $6/8$ time.

Execution. Glissades are of 2 kinds:

Simple—when the foot closes in the same position each time;

Changé—when the foot changes from back to front or vice versa.

Glissade (Simple) to right.

- Prep. { Stand with left foot in 3rd position,
 { Arms in 3rd position right *thruout* exercise.
- { 1. Rise on the toes and slide right foot
 sideward,
 { 2. Close left foot in 5th position behind and
 lower heels.

Continue any number of times.

Same may be executed with foot closing in front each time.

In moving sideward left, the arms will be reversed.

Glissade (changé) to right.

Prep. { Stand with left foot in 3rd position,
Arms in 3rd position right.

1. Rise on toes and slide
Right foot sideward;
Arms move to 2nd position.
2. Close left foot in 5th position behind,
and lower heels;
Arms move to 3rd position left.

1. Rise on toes and slide
Right foot sideward;
Arms move to 2nd position.
2. Close left foot in 5th position and lower
heels;
Arms move to 3rd position right.

Continue any number of times.

Note—Whichever foot jumped to 4th position remains in place, while other foot draws up to it. A "Tortiller finish" is often used, then the 2nd position is executed with *heels out*.

GROUP 3

PORT DE BRAS

Port de Bras—carriage of the arms.

There are 5 different movements possible to the arms:

1. Bending.
2. Stretching.
3. Raising.
4. Lowering.
5. Turning.

The 3 movable parts of the arm are:

1. Shoulder.
2. Elbow.
3. Wrist.

In using the arms the movement always commences at the shoulder and should be slow and soft.

The shoulder is also the dividing line of the arm movements:

High—above shoulder;

Low—below shoulder.

The arms are kept far from the body, hands should be natural, any set position of fingers looks affected and stiff.

In low exercises palms are down, in high exercises palms may be turned up or so that the hands may be easily looked into.

Body is again divided lengthwise into right and left half and the arms do not cross the median line except: in irregular movements, such as: lateral position of arms.

The whole arm should describe an oval—the 2 recognized lines are:

- 1.—Straight.
- 2.—Oval.

In *characteristic dances* this rule is not adhered to and we may have what are called "broken lines."

"Law of Opposition" governs the movements of the arms thus: the arm, opposite to the foot in front, is high.

The *head* follows the high hand; the *body* faces the corner of the room at beginning of each exercise and from that position is turned forward, bent sideward and straightened again. The feet, however, remain facing corner.

"Hands support" is the name of position with hands on hips.

Peasant man's position—Fingers closed and back of the hand on hip.

Peasant woman's position—Palm on hip or back of the hand at front of waist.

Gentleman's (or woman's) position—The wrist and fingers are kept firm (indicating strength and dignity) and the part of the hand between the 2nd and 3rd knuckles is placed on hip.

Music: $2/4$, $4/4$, or $3/4$ time.
